

Director Biotherapeutics

Job ID

REQ-10038839

Feb 05, 2025

USA

Summary

Location: Onsite. Cambridge, MA.

#LI-Onsite

About the role:

We are seeking a PhD and/or MD professional who is a scientific leader in the field of biologics drug discovery especially antibody drug conjugates (ADC). The individual will lead a scientific team within Oncology Drug Discovery (ODD) organization to progress innovative biotherapeutics programs with a focus on antibody drug conjugates. The Director of Biotherapeutics will report to the Head, Oncology Drug Discover, Cambridge (ODD CAM) and will be a member of the ODD Leadership Team.

About the Role

Key Responsibilities:

- Lead the biologics drug conjugates activities for the ODD CAM Site.
- In partnership with other oncology and Novartis Biomedical Research functional leaders, this individual will also lead and drive new areas of scientific investment in biologics drug conjugates including novel targets, tumor targeting modalities, linker payloads as well as external collaborations and partnerships.
- Play a crucial role in working with the Business Development and Licensing (BD&L) group by driving external opportunities that enable us to deliver on our strategy and help with prioritization and decision making on such opportunities.
- As a member of ODD CAM Leadership Team, this individual will contribute to the overall scientific and discovery strategy for the ODD CAM site in close collaboration with functional leaders such as in vivo pharmacology, data science, protein sciences, medicinal chemistry and translational oncology to ensure that we are delivering on our strategy, taking data driven go/no go decisions, resourcing and prioritizing programs accordingly.
- By applying innovative and interdisciplinary thinking toward the development of novel tumor targeting drug conjugates to treat cancer, the Director of Biotherapeutics will be working closely with the global oncology team in crafting an innovative and competitive portfolio for biologics drug conjugates either with antibody or small format biologics.
- Be impactful in the global network externally as well as within and beyond the Novartis Biomedical Research Oncology Disease Area, by ensuring effective alignment with the appropriate experts in the Novartis matrix organization to drive discovery programs efficiently and successfully.

Essential Requirements:

- This position will be located at the Cambridge, MA site and will not have the ability to be located remotely.

This position will require 5% travel as defined by the business (domestic and/ or international).

- Ph.D. or MD/Ph.D in Life Sciences, Chemistry, Chemical Biology or related field.
- Minimum 12 years of biotherapeutics drug discovery and development experience in the pharmaceutical or biotech industry.
- Strong track record in Oncology drug discovery and early development, in advancing biotherapeutics from idea through IND and in building strong partnership with key functional area leaders.
- In-depth knowledge / background in Oncology and biotherapeutics (especially antibody drug conjugates) drug development
- Inherent curiosity to explore innovative approaches to treating cancer along with a strong publication track record and being recognized as an expert within the field of oncology or biotherapeutics drug discovery.
- Consistent experience in leading direct reports with a track record developing talents and building teams.
- Strong leadership presence with the ability to present and interact with senior management

Desirable Requirements:

- Prior experience leading a team responsible for multiple high impact projects.

The Novartis Group of Companies are Equal Opportunity Employers and take pride in maintaining a diverse environment. We do not discriminate in recruitment, hiring, training, promotion or other employment practices for reasons of race, color, religion, gender, national origin, age, sexual orientation, gender identity or expression, marital or veteran status, disability, or any other legally protected status.
