

Sr. Spec. DDIT IES CIS – Storage Engineering

Job ID
REQ-10034598
Feb 21, 2025
Czech Republic

Summary

Novartis is seeking a skilled and experienced Storage Engineer to join our Core Infrastructure Services/Engineering team. In this role, you will focus on designing, implementing, and maintaining storage solutions, with a specific focus on Scale-Out NAS technologies like DELL PowerScale, NetApp, and respective cloud storage offerings. You will work closely with cross-functional teams to ensure seamless integration and optimal performance of storage systems in hybrid environments.

About the Role

Responsibilities:

- **Designing:** You will be responsible for designing scale-out NAS solutions with seamless integration into cloud environments.
- **Deployment:** You will be involved in the deployment of storage systems, working closely with cross-functional teams to ensure seamless integration with existing infrastructure, including on-premises and cloud environments. This includes configuring hardware, software, and networking components to meet the storage requirements.
- **Performance Tuning and Optimization:** You will analyze and optimize the performance of storage systems, identifying bottlenecks and implementing necessary adjustments to enhance the overall performance.
- **Collaboration and Documentation:** You will collaborate with cross-functional teams, including system administrators, network engineers, and cloud architects, to ensure seamless integration and optimal performance of storage systems in hybrid environments. Additionally, you will create and maintain documentation related to storage infrastructure, configurations, and procedures for both on-premises and cloud-based storage.

Your experience:

- Extensive experience in designing and implementing scale-out NAS solutions, such as DELL PowerScale, NetApp, etc., and familiarity with respective cloud storage offerings.
- Strong understanding of storage technologies, including NAS protocols (NFS, CIFS, SMB, S3), multiprotocol file systems, data platforms, and storage architectures.
- Proficiency in storage management tools and software for provisioning, monitoring, and performance analysis.
- Familiarity with cloud storage technologies and platforms, enabling seamless integration of on-premises and cloud storage.
- Experience with cloud storage services, such as AWS S3, Azure Blob Storage, or Google Cloud Storage, and their integration with on-premises storage.

- Strong troubleshooting and problem-solving skills, with the ability to diagnose and resolve storage-related issues in both on-premises and cloud environments.
- Excellent communication and collaboration skills, with the ability to work effectively in a cross-functional team environment.
- Strong documentation skills to create and maintain accurate and up-to-date storage-related documentation for both on-premises and cloud storage environments.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
